

No. of Functional Features Included in the Solution

Date	29 September 2026
Team ID	SWTID-2026-7108
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	Caller Auto-Populate	Fills the caller's department and location automatically when the Caller field changes.	Client Script (onChange)	Done	1
2	Subcategory Filter	Shows only the subcategories that belong to the selected Category.	Client Script (onChange)	Done	1
3	Critical (P1) Alert	Shows an alert message when the Priority is set to Critical (P1).	Client Script (onChange)	Done	0.5
4	Mandatory Close Information	Makes Close code and Close notes mandatory when State is Resolved or Closed.	UI Policy	Done	0.5
5	Missing Information Message	Shows a clear message when close information is missing.	UI Policy	Done	0.5
6	On Hold Reason Visibility	Shows the On hold reason field only when State is On Hold.	UI Policy	Done	0.5
7	On Hold Reason Mandatory	Makes On hold reason mandatory before an incident is put on hold.	UI Policy	Done	0.5
8	Update Set Packaging	Packages all Client Scripts and UI Policies in one Update Set for easy movement to another instance.	Update Set	Done	0.5

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	5
Additional / Nice-to-Have Features	3
Features Tested & Verified	8

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	3	P1 alert, missing information message, On hold reason visibility
2	Backend / Logic	5	Caller auto-populate, subcategory filter, mandatory close information, On hold reason mandatory, Update Set packaging
3	Database / Storage	0	None. Uses the existing Incident table.
4	API / Integration	0	None. Uses built-in GlideForm, GlideUser and GlideAjax APIs.
5	Security / Authentication	0	None. Uses the existing ServiceNow login and roles.
