

Project Initialization and Planning Phase

Date	29 September 2026
Team ID	SWTID-2026-7108
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

I am	I'm trying to	But	Because	Which makes me feel
A service desk agent handling incidents	Raise an incident quickly with accurate caller details	Caller department and location must be typed manually	The form has no script to auto-populate them when the caller is selected	Frustrated by repetitive data entry

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A service desk agent handling incidents.	Raise an incident quickly with accurate caller details.	Caller department and location must be typed manually.	The form has no script to auto-populate them when the caller is selected.	Frustrated by repetitive data entry.
PS-2	A service desk agent resolving incidents.	Close an incident with complete resolution details.	Close code and close notes are often left blank.	No UI policy makes them mandatory when the state is Resolved or Closed.	Worried the incident will be reopened.
PS-3	A service desk agent working on a paused incident.	Record why the incident is on hold.	The On hold reason field is always visible and optional.	Nothing shows or requires it only when the state is On Hold.	Confused about which fields really matter.
